

Buffalo Technology (USA), Inc., based in Austin, Texas, is a leading global provider of award winning networking, memory, storage and multimedia solutions for the home and small business environments as well as for system builders and integrators. With almost three decades of networking and computer peripheral experience, Buffalo has proven its commitment to delivering innovative, best-of-breed solutions that have put the company at the forefront of infrastructure technology.

The TeraStation™ family of products offers cost effective, multi-drive shared storage solutions, ideal for small-to-medium businesses. They are feature-rich and easy to deploy providing high redundancy and reliability.

TeraStation Pro II is a cost-effective, reliable, 4-drive NAS solution for a SOHO or SMB.

TeraStation Duo is a two-drive, high-performance NAS for a SOHO or SMB.

TeraStation III shares many of the same features as the TeraStation Duo, but has 4 hard drives for larger capacities and greater protection. Perfect for any SMB.

TeraStation iSCSI is ideal for efficient server backup, storage consolidation and it offers increased data protection.

TeraStation III Rackmount coming soon!

Network Attached Storage (NAS) provides a central place to store and share all of your data.

LinkStation™ is a NAS solution that makes it easy to add shared storage space to your network. All of your computers and network devices can access files from a LinkStation connected to your network. Ideal for homes and small offices that want easy to use, easy to manage centralized network storage.

LinkStation solutions are offered in a one, two and four-drive units with capacities of up to 8.0 TB. In addition, LinkStation offers many popular features including Buffalo's Web Access, allowing you remote access to your favorite content. You can even share it with family and friends.

AirStation™ wireless product line offers simple and secure networking solutions for home and business.

Nfiniti™ Wireless-N offers great performance and range at an affordable price. The Nfiniti products utilize the latest draft IEEE802.11n wireless technology and are recommended for transferring large files, playing games, or streaming multimedia files.

Wireless G High Power products offer increased range and performance when compared with other 802.11g products. Recommended for users who want reliable and expansive coverage in a large setting, such as multi-story homes and large office spaces.

External Drives are the easiest way to add storage to your computer.

DriveStation™ is a family of desktop and rack mount external hard drives that offers high performance, easy-to-use storage.

DriveStations are available in single and multi-drive configurations with industry standard USB 2.0, eSATA and FireWire 400/800 support.

MiniStation™ is a compact USB 2.0 hard drive family designed for reliable and high performance use. Ideal for laptop and netbook users needing secure portable storage and backup.

MiniStation DataVault provides ultimate security with Full Disk Encryption and the MiniStation Cobalt provides stylish, on-the-go storage for anyone. MiniStation Metro is now available in three fun colors!
